what web companies provide free database of customers address for sending messages?

ChatGPT

There are several web companies that offer free or freemium services for managing customer addresses and sending messages. Here are a few options:

1. **Google Contacts**: Google Contacts is a free service provided by Google that allows users to store and manage their contacts' information, including addresses. It integrates with other Google services like Gmail, making it easy to send messages to contacts directly from the platform.
2. **Mailchimp**: Mailchimp offers a free plan that includes basic email marketing features, including the ability to store and manage subscriber information, including addresses. Users can create email campaigns and send messages to their subscribers using Mailchimp's platform.
3. **Sendinblue**: Sendinblue offers a free plan with limited features, including contact management and email sending capabilities. Users can store and manage customer addresses and send messages to their contacts using Sendinblue's platform.
4. **HubSpot CRM**: HubSpot offers a free CRM (customer relationship management) platform that includes contact management features. Users can store and manage customer addresses and send messages to contacts using HubSpot's CRM platform.
5. **Zoho CRM**: Zoho offers a free CRM platform with contact management features. Users can store and manage customer addresses and send messages to contacts using Zoho's CRM platform.
6. **Freshworks CRM**: Freshworks offers a free CRM platform with contact management features. Users can store and manage customer addresses and send messages to contacts using Freshworks' CRM platform.

It's important to review the features and limitations of each platform to determine which one best fits your needs for managing customer addresses and sending messages. Additionally, be aware of any potential costs associated with upgrading to paid plans if you require more advanced features or higher usage limits.
